

*Thank you for your interest in the Santa Cruz County Housing Element Update. The program you want to access was used to solicit public input on location and density of future housing in the unincorporated areas of the county with urban services such as sewer, water, transportation, jobs, retail, commercial, and medical facilities. This program was recently closed because the County Board of Supervisors adopted the Housing Element on November 14, 2023, and the County now awaits certification of the Housing Element by the State Department of Housing and Community Development.*
