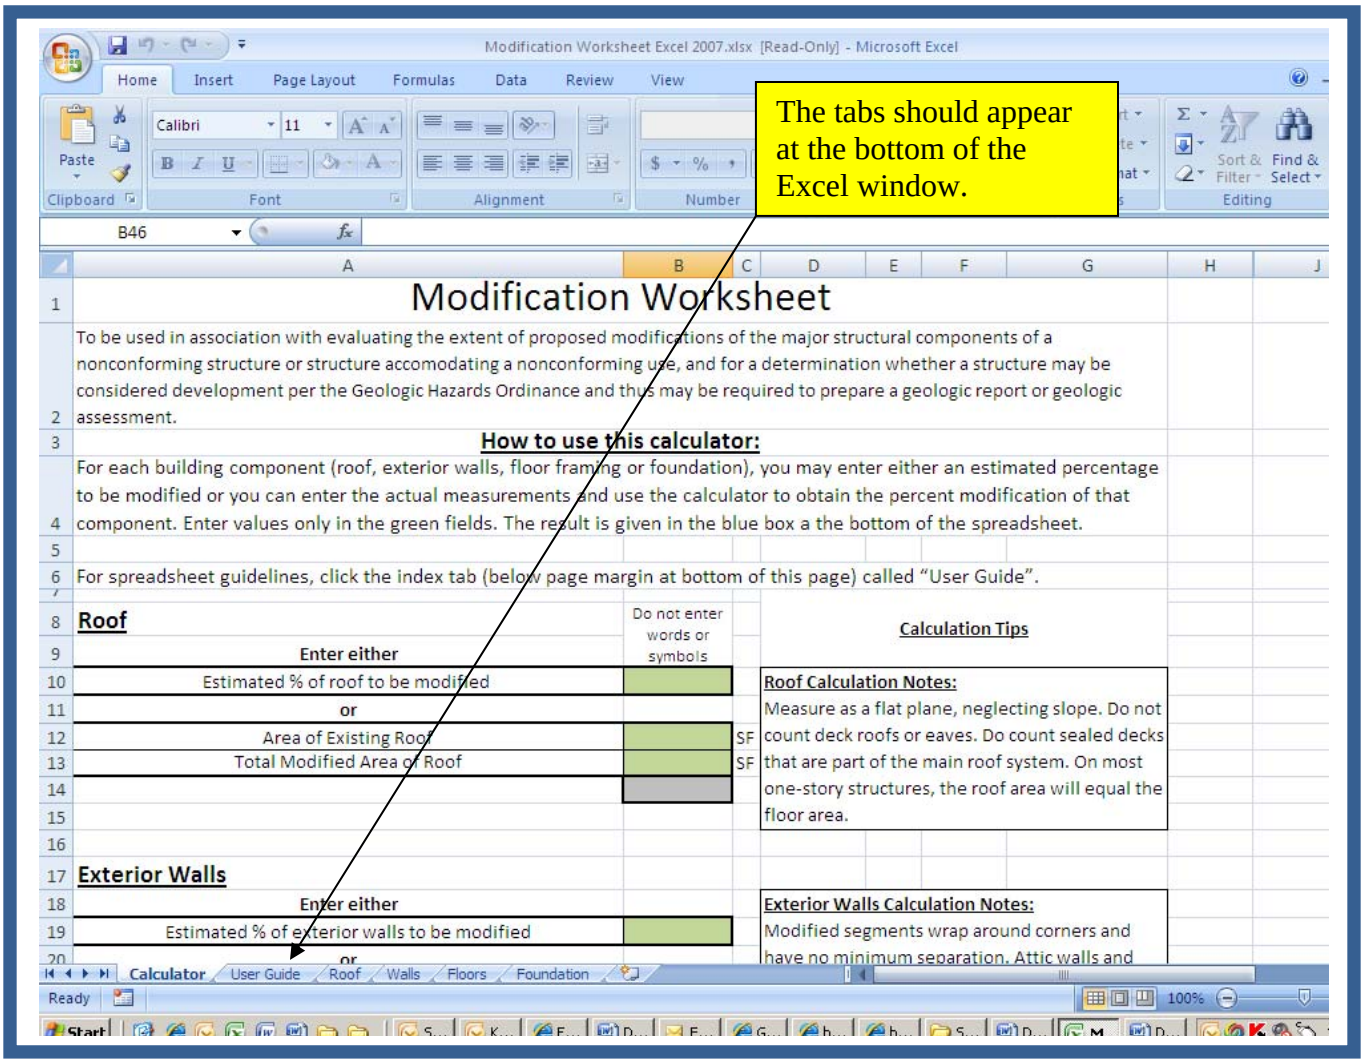
Microsoft Excel
Modification Worksheet Excel 2007.xlsx [Read-Only]
Modification Worksheet
To be used in association with evaluating the extent of proposed modifications of the major structural
nonconforming structure or structure accomodating a nonconforming use, and for a determination whethe
considered development per the Geologic Hazards Ordinance and thus may be required to prepare a geol
assessment.
How to use this calculator:
For each building component (roof, exterior walls, floor framing or foundation), you may enter either
to be modified or you can enter the actual measurements and use the calculator to obtain the percent modification of that
component. Enter values only in the green fields. The result is given in the blue box a the bottom of the spreadsheet.
For spreadsheet guidelines, click the index tab (below page margin at bottom of this page) called "User Guide".
To adjust the window so that the tabs show, click here to maximize.



Modification Worksheet Excel 2007.xlsx [Read-Only] - Microsoft Excel
Modification Worksheet
To be used in association with evaluating the extent of proposed modifications of the major structural components of a nonconforming structure or structure accomodating a nonconforming use, and for a determination whether a structure may be considered development per the Geologic Hazards Ordinance and thus may be required to prepare a geologic report or geologic assessment.
How to use this calculator:
For each building component (roof, exterior walls, floor framing or foundation), you may enter either an estimated percentage to be modified or you can enter the actual measurements and use the calculator to obtain the percent modification of that component. Enter values only in the green fields. The result is given in the blue box a the bottom of the spreadsheet.
For spreadsheet guidelines, click the index tab (below page margin at bottom of this page) called "User Guide".
Roof
Do not enter words or symbols
Calculation Tips
Enter either
Estimated % of roof to be modified
or
Area of Existing Roof
Total Modified Area of Roof
SF
SF
Roof Calculation Notes:
Measure as a flat plane, neglecting slope. Do not count deck roofs or eaves. Do count sealed decks that are part of the main roof system. On most one-story structures, the roof area will equal the floor area.
Exterior Walls
Enter either
Estimated % of exterior walls to be modified
Exterior Walls Calculation Notes:
Modified segments wrap around corners and
